The Circle of Love

The wedding ring goes on the left ring finger because it's the only finger with a vein that connects directly to the heart.

KNOW YOUR METALS

14-KARAT YELLOW GOLD CLASSIC

Durable for daily wear, polishes easily.

WHITE GOLD

Made by mixing pure gold with white metals; can be a less-expensive; alternative to platinum.

PLATINUM

Very white; heavy, durable metal; ideal for engraving.

PALLADIUM

Sister metal to platinum; naturally white metal; strong, non-tarnishing and hypo-allergenic.

Round Brilliant

Emerald

Radiant

Marquise

KNOW YOUR DIAMOND

Diamonds are measured by the “Four Cs.” All four features can make a dramatic impact on the quality, & therefore price, of a diamond.

CUT

Proportions of a diamond and its facets, as opposed to its shape. A diamond gets its brilliancy from the cutting which maximizes the reflection of light.

COLOR

White diamonds are graded on a D-Z scale, D being the most colorless.

CLARITY

The presence of natural marks, called inclusions, in the gem. The Gemological Institute of America judges clarity based on a standard 11-point scale from “Flawless” through “Imperfect 3.”

CARATS

Diamonds are weighed in carats, which may also be expressed as “points,” where one carat equals 100 points.

Oval

Heart

Pear

Asscher

Cushion

Princess
